

NACELLE ARAIGNEE Octopus 18

The Octopus line is characterized by its extreme compactness, which allows all the models in this range to pass within very tight and narrow spaces. All models are equipped with double pantograph joint, which allows unthinkable performance and movements for platforms of this category and, above all, the perfectly verrtical lift/descend. Thanks to the new radio-controlled remote control systems, the operator can manoeuvre the platform without standing in its range of action; this means increased operating safety for the operator during use of the Octopus.

Hauteur mas de travail avec 2 operateurs(m)

Partie aerienne:hydrauliques proportionnels - stabilisation et translation eletro-hydrauliques

Hauteur du plan de la nacelle avec 2

Hauteur à repos(mm) 1980

Rotation de la tourelle 360°

Moteu à essence 15cv/Moteur

Poids machine(Kg) 2650.0

Chariot chenillé à elargissement

1400x700xh1100 - Aluminium

Déport max de travail avec 2

operateurs(m) 8.5

4650
